Send a **text message** to 41411 with the message `famzoo quick-command`
Send an **email** to `command@famzoo.net` with the Subject line `famzoo quick-command`

- You can abbreviate almost everything. The shortest abbreviation for each keyword is underlined.
- To specify a member, account, or checklist, you can use its name or identifying number.
- Italicized words are optional.
- When a name, description, or summary is multiple words, enclose it in single or double quotes.

Example: `famzoo account balance "general spending" emma` retrieves the current balance for Emma's General Spending account. So does: `famz a b gen em`

MEMBERS	
<code><u>m</u>embers list</code>	Responds with the name and identifying number for each member in your family.
<code>member <u>s</u>elect member</code>	Sets the currently selected member to <i>member</i> . FamZoo will use this member as the default whenever you omit the <i>member</i> parameter in future commands. To find out which member is currently selected, send this command without the member option.
ACCOUNTS	
<code><u>a</u>ccounts list member</code>	Responds with the name and identifying number for each account belonging to <i>member</i> . If member is omitted, FamZoo responds with a list of all the accounts you're permitted to see. (Kids can only see their own.)
<code>account <u>s</u>elect account member</code>	Sets the currently selected account to <i>account</i> belonging to <i>member</i> . FamZoo will use this account as the default whenever you omit the <i>account</i> option in future commands. To find out which account is currently selected, send this command without the <i>account</i> and <i>member</i> options.
<code>account <u>b</u>alance account member</code>	Responds with the current balance amount for <i>account</i> belonging to <i>member</i> .
<code>account <u>c</u>redit amt descrip account member</code>	Deposits amt with a description of <i>descrip</i> into <i>account</i> belonging to <i>member</i> . The amount can be entered with or without a leading dollar sign and trailing cents – for example, \$10.00 or 10.00 or just 10 all work. If everything after <i>amt</i> is omitted, FamZoo leaves the description empty and credits the currently selected account.
<code>account <u>d</u>ebit amt descrip account member</code>	Withdraws amt for a purchase described by <i>descrip</i> from <i>account</i> belonging to <i>member</i> .
<code>account <u>n</u>ew account member</code>	Creates a new spending account named account owned by <i>member</i> .
CHECKLISTS	
<code><u>l</u>ists list</code>	Responds with the name and identifying number of each checklist you're permitted to see (either because you own it or it's being shared with you).
<code>list <u>s</u>elect list member</code>	Sets the currently selected list to <i>list</i> owned by <i>member</i> . FamZoo will use this list as the default whenever you omit the <i>list</i> parameter in future commands. To find out which list is currently selected, send this command without the <i>list</i> and <i>member</i> options.
<code>list <u>s</u>how list member</code>	Responds with the identifying number and description of each open item on <i>list</i> owned by <i>member</i> . Open items are ones that are not marked as completed or expired.
<code>list <u>a</u>dd item-summary list member</code>	Adds an item described by <i>item-summary</i> to <i>list</i> owned by <i>member</i> .
<code>list <u>c</u>reate name</code>	Creates a new checklist named <i>name</i> . The newly created checklist becomes the current list.
<code>list <u>s</u>hare whom list</code>	Shares your <i>list</i> with <i>whom</i> , which can be one of the keywords: family , parents , children , or nobody .
<code>item <u>c</u>omplete item list member</code>	Marks item on <i>list</i> owned by <i>member</i> as complete. You can supply the identifying number or the beginning of the item summary for item.
<code>item <u>d</u>ue date item list member</code>	Sets the due date to <i>date</i> for item on <i>list</i> owned by <i>member</i> . You can indicate a date like October 5th, 2009 using any of the following formats: 10.05.09 or 100509 or 10/5/09. You can leave off the year to default to the current year. You can also use the keywords today , tomorrow , or week (for a week from today) instead.
<code>item <u>o</u>ccurs frequency item list member</code>	Makes item on <i>list</i> owned by <i>member</i> repeat with frequency which can be one of daily , weekly , or none . You can qualify the weekly option with the day specifiers m , tu , w , th , f , sa , and su . For example, <code>weekly:mwf</code> indicates the item should repeat every Monday, Wednesday, and Friday.
SHORTCUTS	
<code><u>s</u>hortcuts list</code>	Responds with the name and associated command for each shortcut you've defined.
<code>shortcut <u>c</u>reate name command</code>	Defines a shortcut named <i>name</i> that is equivalent to sending <i>command</i> . For example: shortcut create emma account balance "general spending" emma allows you to just send the shortcut "emma" to retrieve the balance in Emma's General Spending account.
<code>shortcut <u>d</u>elete name</code>	Deletes the shortcut named <i>name</i> .
